

A Microsoft 365 Security Case Study

Long-Established Civil Engineering Company

The Challenge

With multiple sites, and in the field workforce and mobile offices, the company needed a solution that would let their people work from anywhere. Microsoft Azure was the perfect solution, but the out of the box setup wasn't secure enough.

They needed an expert.

The Solution

Softwerx are a Microsoft Gold Partner who specialise in cyber security. The perfect partner to help build a secure Microsoft Azure environment.

Softwerx helped make sure the company were making best use of the technology they were paying for. As well as reviewing the licensing to ensure the business were getting the best possible value for money, Softwerx developed and implemented a comprehensive security plan.

Softwerx helped us quickly and affordably secure our Microsoft Azure setup.

The Outcome

With Softwerx managing their systems the company have a comprehensive view of their Microsoft Cloud Environment.

They are protected by having complete visibility of the status of the system and patterns making it possible to spot, and respond to, unexpected events.
