

Vulnerability Management

Identify and expose critical threats to your business.

The Vulnerability Scanning Management Service is a comprehensive vulnerability scanning and management service that allows for the management of business-critical vulnerabilities in a single solution.

It allows the identification and management of both internal and external threats, the reporting of risks and can ensure compliance with current and future regulations (e.g. PCI and GDPR).

It's difficult to know, what you don't effectively know; the vulnerability scan quickly highlighted our critical security holes.

UK Pension Consulting Firm

Discovery Scans

Map you attack surface with network and port scanning.

Vulnerability Scans

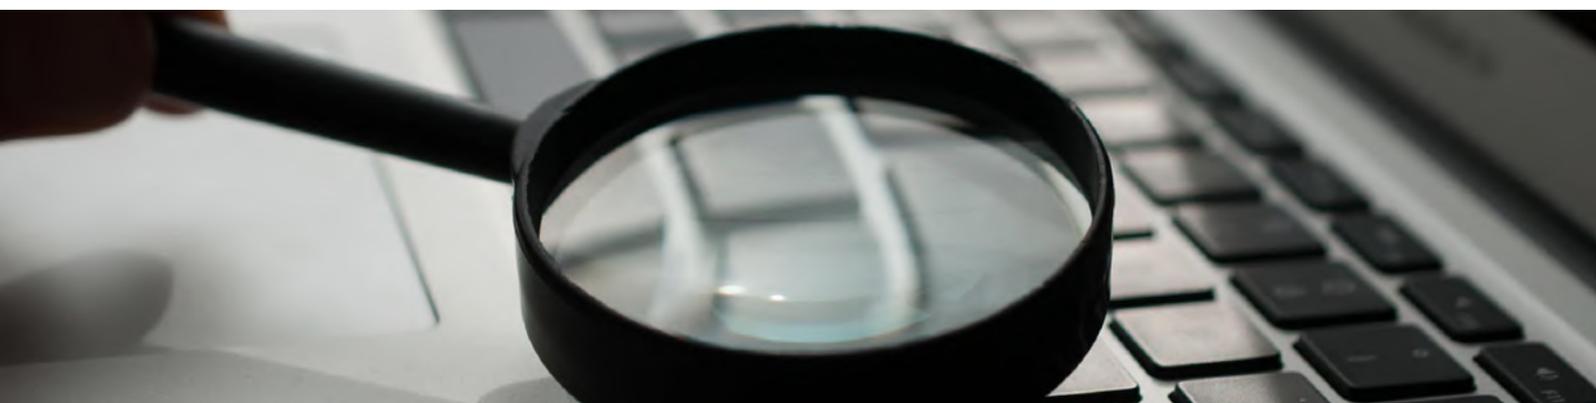

Scan systems and web applications for publicly known vulnerabilities.

Vulnerability Management

Manage vulnerabilities centrally with security alerts and forensics.

PCI DSS Compliance

Ensure compliance with current and future regulations.

Making the Case for a Vulnerability Management Service...

The Challenge

- × Determining your total attack surface can be overwhelming and labour intensive.
- × It's difficult to know where to start in understanding your entire estate.
- × It's almost impossible to stop every security threat.
- × Building a team in house is time consuming and expensive.

The Solution

-→ ✓ We can manage your attack surfaces using intelligent, automated tools.
-→ ✓ A discovery scan can map your total threat landscape in minutes.
-→ ✓ We can help you stay ahead of any attacks through identification and prediction.
-→ ✓ Our team are highly qualified and experienced in cyber security and firewall management.

Take Action

If you would like to learn more about this managed service or how we can help your business, please contact one of our security experts for an initial consultation on 01223 834 333.

When cyber security is not your core business a managed service is a great way to access the skills and expertise you need.

We've invested in developing and managing a highly skilled team of qualified security administrators and analysts – so you don't have to. All our managed security service packages are delivered from our dedicated and highly accredited security operations centre (SOC), just outside Cambridge.
