A Log Management Case Study

National Conveyancing Experts

The Challenge

The business knew that they needed to keep an archive of their data, what they did not know was that they also needed a log of their security events and responses.

To remain compliant, they needed a log management solution, but initially the options available in the marketplace were overwhelming.

The Solution

Softwerx guided the business through the options, and they selected an AlienVault solution.

Softwerx were able to offer a managed service around the software solution that made the whole process much less painful and less expensive than they had initially feared.

It was clear from the outset, they [Softwerx] were subject matter experts, they were also refreshingly independent.

The Outcome

The solution gives the business a complete security information and event management (SIEM) system that plays a central role in their GDPR compliance.

The business now has an instant audit trail that they can access in minutes – ensuring they are secure and demonstrably compliant.
